Discover Your
Choices At

Door Collections

Morgan-Wightman is proud to offer quality crafted doors by Lemieux. Each Lemieux door is individually detailed, assuring an extraordinary fit and finish. They have perfected a protective UV sealer system which is applied immediately before the finishing coat that seals the wood, removing all traces of cracks and crevices in the joints, and avoids accentuating brush strokes, knots, and wood grain.

Versailles—Primed

- **French Doors:** built using a clamp glazed method perfected by Lemieux in 1992 eliminating the use of nails and staples for a clean, unblemished finish.
- **Le Chateau:** multitude of panel designs in primed or natural wood species that will add elegance to any room. Advanced engineering of rails and stiles results in a door that is not only lighter, but requires no special screws for installation.
- **Artisan:** unparalleled attention to detail captures the rustic appeal and charm of this collection. Complete with durable MDF panel components and warranty against splitting.

Le Palais—Oak

French Door—Cherry

- **Le Palais:** graces intricate and inventive designs which can provide a distinctive personality to your home. The doors incorporate MDF panels for strength and stability as well as a refined style.
- **Versailles:** complete stile-and-rail door with superior construction enhanced from its Laminated Veneer Lumber (LVL) core and double-coated primer process.
- **Traditional:** versatile doors available with panels, louvers or bifolds. Offered in single-hip split resistant or solid-hip panel designs and in a wide assortment of sizes.

LVL Core Technology

Laminated Veneer Lumber (LVL) derives its strength from an impressive number of tightly bonded wood veneers, glued together layer upon layer, forming a solid tension-resistant core. This core withstands the tendency to warp and twist since the layers of veneer are arranged on edge. This technology is available in many of their door collections.

Add A Sidelight And Transom

Brighten any doorway by adding sidelights and a transom. Lemieux offers many models to choose from. This is a great way to bring in natural light and really set your entryway off.
